

Luis Roman

Software Developer/Validation engineer
Guadalajara Jalisco, Mexico

About me

I'm a software engineer graduate of computer science degree. I love to develop software for little purposes in my daily life as a hobby, design web systems and contribute with open source projects.

Knowledge

Knowledge of multiple programming languages like java, c, c++, python and php. Database systems management like Mysql, Postgresql and its implementations on web and desktop systems. Linux commands and API Rest services consuming with javascript. And soft-skills like teamwork abilities, leadership and take different kinds of roles as the situation requires.
