ABOUT ME

I'm a software developer graduate of computer science degree. I love to develop software for little purposes in my daily life as a hobby, design web systems and contribute with open source projects.

ABILITIES

Knowledge of multiple programming languages like **java**, **c**, **c++**, **python** and **php**. Management of database systems like **mysql**, **postgresql** and its implementations on web and desktop systems. **Linux commands** and API Rest services consuming with **javascript**. Also teamwork abilities, be responsible and take different kinds of roles as the situation requires.

EXPERIENCE

IBM - *Test analyzer*

November 2020 - January 2021

- Failure gestion in servers' tests process
- Use of the Linux/Unix CLI to search issues in servers

Foxconn - *Test engineer*

March 2021 - July 2022

- Test server's gestion on Linux
- Linux CLI file system managing across network
- Bash scripting
- Python scripting

Intel corporation / Solidigm - *SSD systems administrator*

July 2022 - May - Current

- SSD issues managing
- SSD functional validation
- Linux CLI for general purposes
- Bash scripting for automate tests
- Python scripting
- Tools development in Python for process streamlining
- Issue management with Jira

EDUCATION

Universidad De Guadalajara CUTonalá, Tonalá, Jal. - *Ingeniería en ciencias computacionales*

January 2017 - November 2020

study area:

Software development on multiple languages for different purposes, database design and its implementations, concurrent and parallel programming, and linux systems administration.

LANGUAGES

Spanish - writing/reading 100% speaking 100%

English - writing/reading 60% speaking 40%

HOBBIES

- Play classic video games
- Cook
- Read manga
- Ride on bike
